- O. On/Off Switch
- P. Intelligent Cooling System
- Q. VGA Port - Intel® H61 PCH
with DMI 5GT Chipset
- R. One PCI-E x8 Expansion

Dimensions

17.4"(W) x 11.5"(D) x 1.73"(H)

Processors

- Intel® Core™ i3-2120 Processor
Quad Core
- Intel® Core™ i5-2400 Processor
Quad Core
- Intel® Core™ i7-2600 Processor
Quad Core

Memory

- Dual Channel DDR3 RAM 2 - 16GB
- 8GB Compact Flash For OS Restore

Storage

- Solid State & SATA 500GB to 3TB
- Software RAID I
- 80GB (SSD) to 750GB
- SATA, Mirrored

The Union Built PC Model 300 is designed with the latest technology and features.

Unlike other servers which take an everything-and-the-kitchen-sink approach when it comes to which softwares to include, the UB-300 comprises only those programs it needs to deliver those features you need.

As a result of the expertise of Union Built PC's developers and our customized solutions for the Labor Industry, your Union Office will benefit from a modular construction, only running those applications you need. This makes the UB-300 the most robust, reliable and cost efficient server on the market.

About Union Built PC

Union Built PC, Inc. has been serving the IT needs of Labor since 2001. Union Built PC's mission is to "organize" Labor and help them "excel in everything they do." Union Built PC believes their success is based on products and services that have been developed by Union Members and customized to meet the specific needs of their Labor Union Clients. That's why every member of the Union Built PC team is a Union Member.

The staff of Union Built PC have been members of many Local unions and Labor organizations over the decades. Currently, UBPC is organized by CWA Local 1101.
